

ACROVYN® BED LOCATORS

Bed Locators are crucial to protect walls from damage at bed head locations. In addition, where there are medical equipment rails mounted on the bed head walls, bed locators can be fixed with stand-off brackets affording protection to the equipment rails, when the bed positions are altered.

The range offers vertical or horizontal orientations with differing stand-offs and includes an anti-ligature solution.

Bristol Royal Infirmary

BL100, BL100A, BL100M and BL100AM

BL100

BL100A

Features

- Acrovyn cover over continuous aluminium retainer
- Acrovyn End Cap options providing precise bed location (BL100, BL100M) or bed head rail protection (BL100A, BL100AM)
- BL100 and BL100A models are mounted on cushions
- BL100M and BL100AM are mounted on powder coated aluminium extended brackets (max 300mm stand off)
- For extra durability we recommend fixing bed locators to plywood pattresses or timber noggings
- Acrovyn cover and End Caps available in all Acrovyn Profile colours
