

C/S Acrovyn® Crash Rails and Bumper Guards

▲ College of Further Education (Germany)

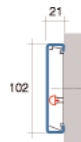

▲ Herman Hospital (USA)

There is no better or simpler way of protecting walls from damage than using a C/S **Acrovyn®** Crash Rail.

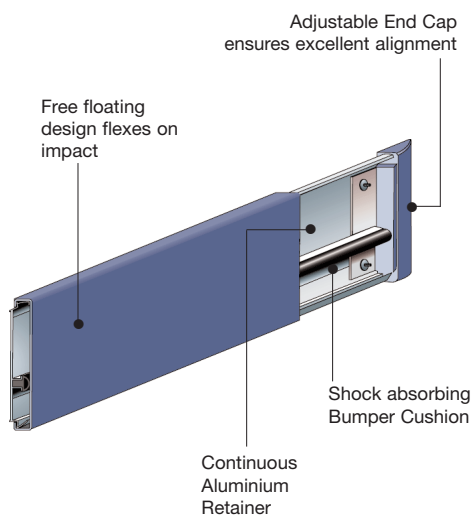

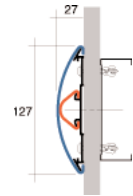

Mounted at impact level, these crash rails range from 102mm in depth to 203mm.

All profiles use either aluminium retainers with integral bumper cushions or with simple mounting clips and snap-in cushions for economy.

C/S Acrovyn® Crash Rails and Bumper Guards

▲ Health Centre (Germany)

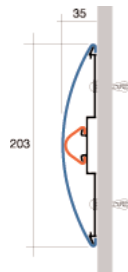

▲ Health Centre (Germany) - Detail

C/S Acrovyn® have added two new profiles to its range of Crash Rails, **SCR-50** and **SCR-80**.

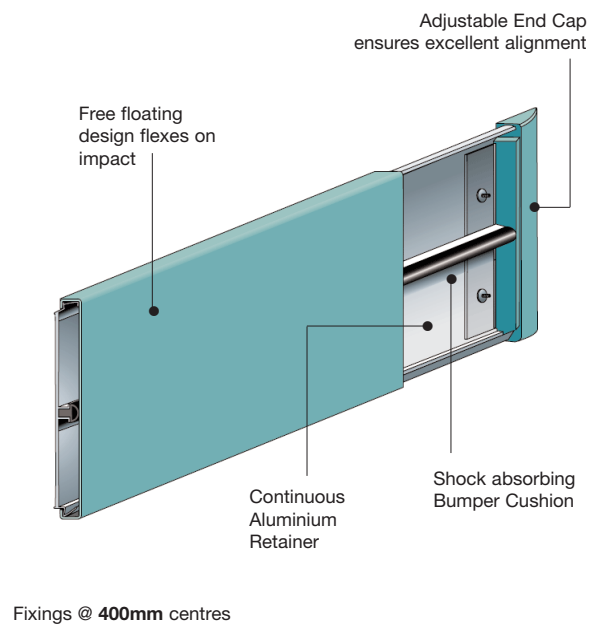

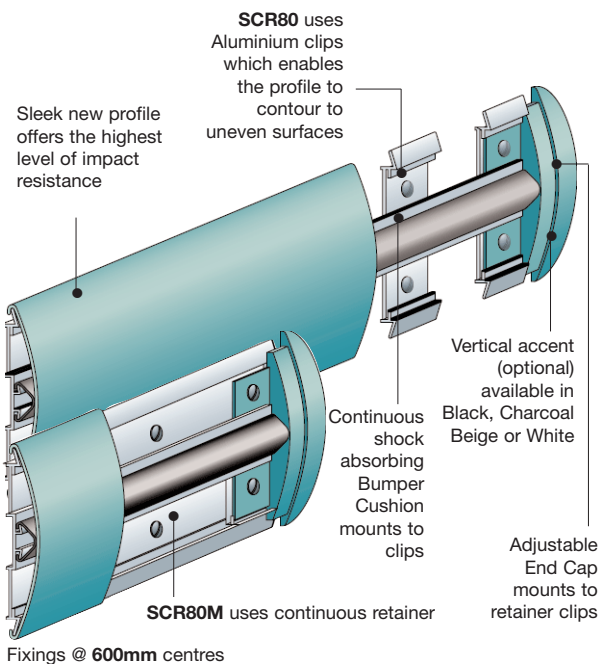

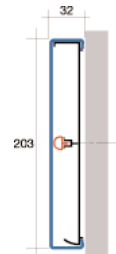

Both profiles not only look great but are capable of withstanding the roughest of treatments that can be inflicted by mobile equipment.

Now wall protection can be visually stunning as well as functional.

C/S **Acrovyn**® Bumper Guards and Trolley Plate add to the portfolio of wall protection on offer to the specifier.

They provide an effective alternative to the Crash Rail, especially in areas that are less heavily trafficked.

C/S Acrovyn® Crash Rails and Bumper Guards

▲ Royal Mail Canteen (UK)

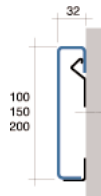

▲ HMS Drake Plymouth (UK)

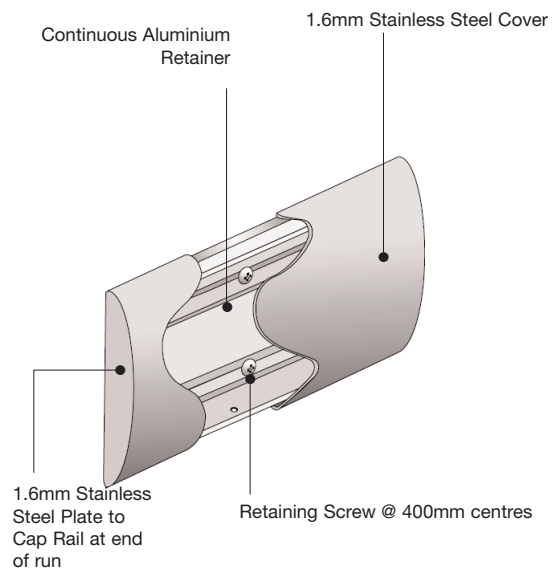

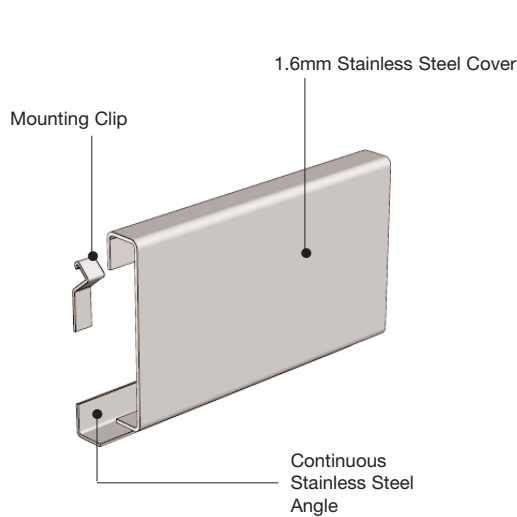

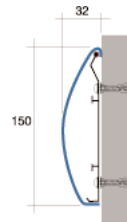

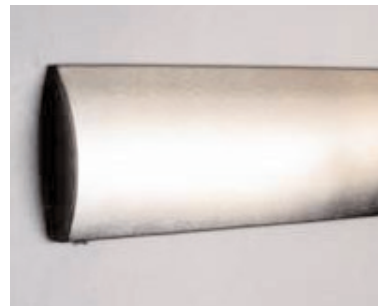

C/S Acrovyn® Stainless Steel Crash Rails give the specifier considerable options for size, profile and finish. They are available in dull or polished finish, and in a variety of rail depths.

These profiles are particularly suited to areas that require both protection and a hygienic finish such as canteens, kitchens and food processing areas, pharmaceutical and hospital laboratories.
