Available for Zone 2 options

C/S Pediluxe Gold

Brass Capping to aluminium rail

Vinyl Endfiller for field trimming

Continuous vinyl spline and cushion (open or closed)

Aluminium rail provides excellent rolling load strength

Micro scrapers

Rail Options

* Standard

C/S **Pediluxe**[®] and C/S **Pediluxe Gold**[®]

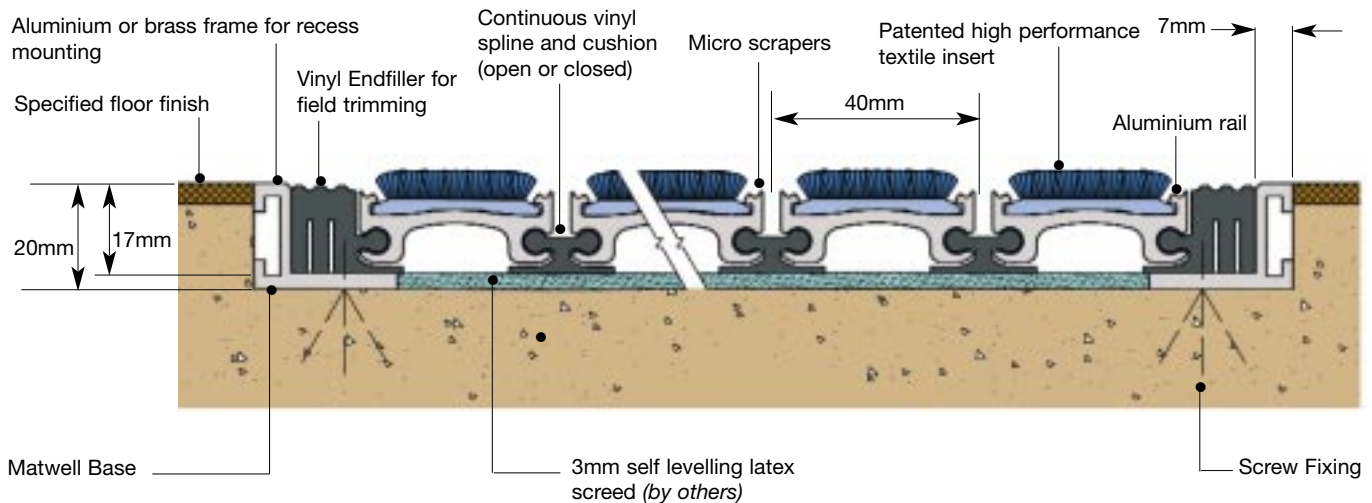

Festival Place Shopping Centre - Basingstoke

C/S **Pediluxe** is the most versatile of all the aluminium profile systems. It combines rugged construction with a luxury 'feel' underfoot and enough tread and colour options to satisfy the most discerning specifier.

Under stringent test conditions C/S **Pediluxe** demonstrated an exceptional load bearing capability which makes it especially suitable for high volume areas such as shopping centres, hospitals and passenger termini, while its elegance recommends it to a multitude of other applications. C/S **Pediluxe** features an open or closed vinyl spline, which either allows waste to drop through or to be retained in deep channels between the rails. For quick and easy installation it's 17mm depth fits directly into most existing mat wells.

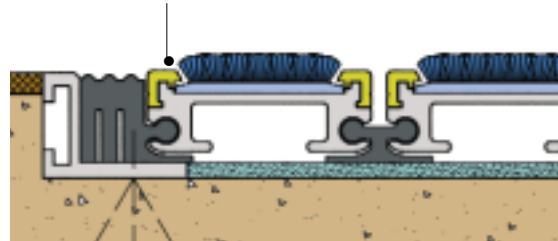

C/S **Pediluxe Gold** our brass rail version presents an entrance flooring system of simply stunning quality and appearance.

C/S **Pediluxe** and C/S **Pediluxe Gold** Product Data

- Recess or surface mounted options
- Rolls up for easy matwell cleaning
- Exceptional rolling load capabilities in excess of 500kgs/wheel (C/S **Pediluxe Gold** 350kgs/wheel)
- Up to 8 times more absorbent than competitive products when used in conjunction with C/S **Pedisystems** patented performance textile
- Closed spline option with deep channels allows in situ cleaning along with very high dirt containment
- Open spline option allows dirt to fall into the matwell, the mat is then rolled up for matwell cleaning
- Field changeable inserts without the use of specialist tools for low lifecycle costs
- C/S **Pedijet** logo system option for **Zone 2** applications (see p26)
- Wide range of tread options (see p24)
- Wide range of colour options (see p28)
