C/S Pedimat®

University of Leeds Business School - Leeds

C/S **Pedimat** is the perfect entrance flooring solution for buildings in moderate use such as offices, shops, hotels, banks and buildings societies, and where colour and design specification is often as critical as dirt stopping capabilities.

C/S **Pedimat** can be recessed or surface mounted, either in a ramped frame or to butt level with a surrounding carpet. Carpet, vinyl or abrasive tread infills can be specified individually or in combination, along with our unique open or closed vinyl spline, which either allows waste to drop through or be retained in channels between the rails. With either option C/S **Pedimat** rolls up for easy under-cleaning.

C/S **Pedimat** Product Data

- Recess or surface mounted options
- Rolls up for easy matwell cleaning
- Excellent moisture and dirt removal/containment in conjunction with C/S **Pedisystems** patented performance textile
- Closed spline option with deep channels allows in situ cleaning along with very high dirt containment
- Open spline option allows dirt to fall into the matwell, the mat is then rolled up for matwell cleaning
- Field changeable inserts without the use of specialist tools for low lifecycle costs
- C/S **Pedijet** logo system option for **Zone 2** applications (see p26)
- Wide range of tread options (see p24)
- Wide range of colour options (see p29)
- Wide range of frame options (see p30)
